**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

**Status**

- 1) ☒ Responsive to communication(s) filed on 12 April 2006.
- 2a) ☐ This action is **FINAL**.                      2b) ☒ This action is non-final.

## **DETAILED ACTION**

### ***Election/Restrictions***

Claims 7-26 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on April 12, 2006.

Applicant has stated in the reply filed on April 12, 2006 that his elected species A corresponds to Figures 1-4 and that claims 1-9 are readable on the elected species. Review of the drawings and claims, however, suggests that applicant's statement is not accurate. Claim 7 recites the valve assembly to include a first sensor, which causes the drive to move the sealing member to the unshielded position. Figures 1-4 do not disclose or suggest such a sensor as a part of the float operated valve assembly. Claims 7-9 are therefore readable on a nonelected species.

### ***Claim Rejections - 35 USC § 102***

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States

only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1-6 are rejected under 35 U.S.C. 102(e) as being anticipated by David et al (U.S. Patent No. 6,536,465). The patent to David et al discloses a shut-off valve assembly comprising a body (10) attachable to a fluid line and having a chamber in which a baffle arrangement (48) is located. The body includes a valve member (40) that is movable to a shielded position by the baffle arrangement wherein the valve member is not movable by the fluid stream against the valve seat and an unshielded position wherein the valve member is movable by the fluid stream against the valve seat to seal the outlet, col. 5, lines 38-61. A float drive (64) actuates the valve member.

Claims 1-3 are rejected under 35 U.S.C. 102(b) as being anticipated by Ericson (U.S. Patent No. 812,030). The patent to Ericson discloses a shut-off valve assembly comprising a baffle arrangement (3), valve member (2<sup>a</sup>) including a sealing member (2) and a drive (11) for moving the sealing member between a shielded and unshielded position in the baffle arrangement; see page 1, lines 40-82.

### ***Conclusion***

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. The patent to Shannon (U.S. Patent No. 218,325) is cited for the additional showing of a valve assembly including a baffle (N) for a valve member (L), the baffle shielding the valve member against the incoming fluid flow in the open position.
